LEARN AND APPLY THE CODE TO YOUR WORKPLACE AT YOUR WORKPLACE

# ON-SITE TRAINING

NFPA® on-site training is the premier training experience, where code experts conduct interactive instruction for 10 or more employees at your work-site. Content is tailored to your environment and facility needs, and trainers provide answers to your code concerns. Investing in code knowledge pays off! The better your employees understand requirements, the easier it is to ensure compliance.

**Bring NFPA code experts to your facility!**

## Achieve your goals with new NFPA® training opportunities.

Ongoing training is the key to success in the safety field. That's why, as codes and standards evolve, NFPA adds new programs that help you understand how requirements are applied in the real world. Enroll in updated, expert-led *NEC*® training (pages 4-5), learn about water-based system ITM using the 2017 edition of *NFPA 25* (pages 12-13), and help protect workers from hazards in confined spaces using *NFPA 350* (page 22). We've also added training on the 2012 editions of *NFPA 101*® and *NFPA 99* to help health care professionals address recent code adoptions by the U.S. Centers for Medicare & Medicaid Services (CMS) (pages 14-17).

### Maximize your time with convenient NFPA training weeks!

NFPA Classroom Training Programs are grouped by week and by topic, so it's easier for you to schedule consecutive days of the industry's best instruction. Take a full week of training on the *NEC* and *NFPA 70E*®, add skills in water-based fire protection and *NFPA 13* along with *NFPA 25* for ITM, or build knowledge in *NFPA 101: Life Safety Code*® and *NFPA 99: Health Care Facilities Code*. Find weeks that work for you in the chart at right.

**3-DAY CLASSROOM TRAINING**

**NEW! 2017 NFPA 70®  
National Electrical Code® Essentials**

This dynamic training program is up-to-date with the 2017 *NEC*, to help you ensure safe and compliant electrical installation and design. Improve your ability to locate, interpret, and apply requirements in the ever-evolving *National Electrical Code*. Interact with NFPA's renowned electrical instructors in a collaborative learning environment, with topic-driven lessons, discussion, activities, and real-world exercises based on important *NEC* concepts. You'll leave with vital takeaways that will help you comply, increase confidence in your ability to recognize potential problems, and avoid costly rework or safety violations.

Confirm your understanding of topics covered and demonstrate proficiency by earning your Certificate of Educational Achievement, available after the class through an online review and exam.

**Upon completion you should be able to:**

- Determine if an electrical installation complies with all access and space requirements
- Implement general requirements for service, feeder, and branch circuit conductors and overcurrent devices for a premises wiring system
- Recognize all critical component sizes and locations in an effective grounding scheme

**ONLINE TRAINING SERIES**

**NEW! 2017 National Electrical Code®**

Maximize time by taking *NEC* training online, without compromising job demands. This updated, six-course online training series based on the 2017 edition of the *NEC* addresses navigation and application for all types of occupancies. Work at your own pace to understand how Code compliance and proper use and installation of electrical equipment leads to approval by AHJs and other enforcement professionals. Each one-hour course ends with an exam to test your knowledge.

**Introduction to the 2017  
National Electrical Code**

\*The *National Electrical Code* Online Training Series is approved for CEU credit in all six states below, with additional states in the works.

NFPA 70E online training on page 7 is also approved for CEU credit. Find out if your state accepts NFPA online courses for CEU credit at [nfpa.org/slp](http://nfpa.org/slp)

**2-DAY CLASSROOM TRAINING**

**2015 NFPA 70E®  
Electrical Safety in the Workplace**

Electrical incidents are more costly and more often fatal than other types of work incidents. Learn how to use the 2015 *NFPA 70E* to help assess electrical risks and reduce employee exposure to hazards. Originally developed at OSHA's request, *NFPA 70E* helps you save lives, reduce liability, and avoid tragedies and loss on the job. The field's most dynamic and interactive classroom training helps prepare you to set up and follow an electrical safety program, as well as help document safety procedures for compliance. Confirm your understanding of topics covered and demonstrate proficiency by earning your Certificate of Educational Achievement, available after the class through an online review and exam.

**Upon completion you should be able to:**

- Understand the interaction between *NFPA 70E* and OSHA requirements
- Define electrical safety hazards and how to help protect against shock and arc flash
- Identify safety policies and procedures employers are legally required to provide for their workers

**3-DAY CLASSROOM TRAINING**

**2016 NFPA 72®  
National Fire Alarm and Signaling Code**

Understand the changing role of traditional fire alarm systems and how to apply *NFPA 72* for enhanced safety and compliance. Taught by industry authorities, this interactive class is fully updated based on the 2016 *NFPA 72: National Fire Alarm and Signaling Code*. In addition to new technologies and major revisions in the Code, NFPA's activity-rich training addresses first-time coverage of Class N circuits, along with the latest requirements for initiating devices, notification appliances, control units and power supplies, circuits and pathways, and emergency control functions.

Confirm your understanding of topics covered and demonstrate proficiency by earning your Certificate of Educational Achievement, available after the class through an online review and exam.

**Upon completion you should be able to:**

- Locate, interpret, and apply *NFPA 72* requirements
- Understand and apply requirements for circuits and pathways, including new Class N circuits
- Locate and apply new requirements for interconnected fire alarm control units

**Modules:**

- Introduction to *NFPA 13* Occupancy and Commodity Hazard Classifications
- Fire Sprinkler System Types and Applications
- Water Supplies and Design Approaches for Fire Sprinkler Systems
- Working Plans, Hydraulic Calculations, and System Acceptance
- Fire Sprinkler System Components and Other Hanging and Bracing Requirements
- Fire Sprinkler Installation Requirements

**ONLINE TRAINING SERIES**

**NEW! 2016 NFPA 13 Storage Protection Requirements and Assessments**

This three-course online training series provides an essential foundation for understanding the design, installation, and analysis of storage fire sprinkler protection based on the 2016 *NFPA 13*. Work at your own pace to understand the application, design, and assessment of automatic sprinkler systems protecting miscellaneous and warehouse storage occupancies. The series also covers sprinkler system components and building features—as well as critical details concerning storage arrangement that affect sprinkler design and analysis.

**ONLINE TRAINING SERIES** 7AB-OLS018 **\$144.00** | **\$129.60 Members**

Pass the online exam to qualify for .3 CEUs.

**Modules:**

- Commodity Classification and Critical Definitions for Storage Protection Design
- Protection of Floor Shelf, and Miscellaneous Configurations
- Protection of Rack, Tire, Roll Paper and Special Storage

**1-DAY CLASSROOM TRAINING**

**NEW!** 2017 NFPA 25 Inspection, Testing, and Maintenance of Water-Based Fire Protection Systems

Gain a fundamental understanding of how the new edition of *NFPA 25: Inspection, Testing, and Maintenance of Water-Based Fire Protection Systems* works to help ensure sprinkler systems are ready for action. This one-day training program uses discussion and job-based activities to explain inspection and testing rules for components, signs of corrosion, managing impairments, the owner's responsibilities for compliance, and ITM task frequencies.

Confirm your understanding of topics covered and demonstrate proficiency by earning your Certificate of Educational Achievement, available after the class through an online review and exam.

**Upon completion you should be able to:**

- Explain the scope and purpose of *NFPA 25*, and its interaction with related standards
- Explain the process for managing system impairments
- Identify key inspection points including sprinklers, piping, hangers, fire pumps, and valves

**2-DAY HANDS-ON TRAINING**

**NEW!** Hands-on 2-Day Training for Facilities Managers—Essentials for Life Safety and Fire Protection Systems

Developed expressly for facility managers, this special hands-on training deepens your understanding of the fire protection and life safety systems in your facility—as well as how requirements in *NFPA 101*®, *NFPA 72*®, and *NFPA 25* are applied in practice. After expert-led classroom instruction and demonstrations in a state-of-the-art lab, you'll walk away with the insights and knowledge needed to help manage vendors, provide answers to AHJs, and ultimately, keep occupants safe.

**Upon completion you should be able to:**

- Identify life safety requirements (*NFPA 101*)
- Identify requirements for inspection, testing, and maintenance of fire alarm systems (*NFPA 72*)
- Understand Facility Manager Roles & Responsibilities as they relate to *NFPA 25*

- An Introduction to *NFPA 25*
- Using *NFPA 25* to Inspect, Test, and Maintain Sprinkler Systems

**Modules:**

- Stationary Pumps for Fire Protection
- Design and Installation of Fire Pumps

# If the CMS adoptions impact you, depend on NFPA® for high-impact Code training.

Health care providers that participate in federal reimbursement programs are mandated to meet the new (CMS) Conditions of Participation based on the 2012 editions of *NFPA 101®: Life Safety Code®* and *NFPA 99: Health Care Facilities Code*. The Classroom and Online Training Programs detailed here and on the following pages are designed to meet your needs, whether you're a health care facility manager, hospital administrator, or have another role in facility safety and compliance. Take NFPA professional training to know what to expect on your next CMS audit.

For more information about NFPA products, training, and certifications related to CMS, visit our CMS resource site at [nfpa.org/cms](http://nfpa.org/cms)

## 3-DAY CLASSROOM TRAINING

### 2012 NFPA 101 Life Safety Code Essentials for Health Care Occupancies

NFPA® classroom training helps you ensure your organization stays in compliance with provisions in the 2012 *NFPA 101* as outlined by the U.S. Centers for Medicare & Medicaid Services (CMS) adoption of this edition. Expert-led instruction covers the 2012 Code as it relates to the health care environment—along with key differences from the 2000 edition. Confirm your understanding of topics covered and demonstrate proficiency by earning your Certificate of Educational Achievement, available after the class through an online review and exam.

#### Upon completion you should be able to:

- Classify occupancies and building issues found in health care facilities
- Apply health care-specific provisions for doors, including locking arrangements
- Determine the appropriate occupant load factors based on various uses of a health care facility

#### ▶ 2012 NFPA 101: Life Safety Code Essentials for Health Care Occupancies Classroom Training (Without Online Exam or Certificate)

## ONLINE TRAINING SERIES

### 2015 NFPA 101® Life Safety Code® Occupancies

Be prepared to identify the unique issues, *NFPA 101* requirements, and configuration provisions related to specific types of occupancies. This series of five interactive courses offers the specific *Life Safety Code* training you need based on your facility. It's ideal for busy facility managers, risk managers, AHJs, safety directors, contractors, architects, and engineers.

Each one-hour course ends with an exam to test your knowledge. Recommended prerequisite: *NFPA 101* Essentials Online Training Series (see page 18) or equivalent.

#### SAVE 10% when you register for the series!

ONLINE TRAINING SERIES 7AB-OLS010 \$270.00 | \$243.00 Members

Pass the online exam to qualify for .1 CEU per course/.5 CEUs in all. Individual courses also available.

Online Training for the 2012 NFPA 101 for Health Care Occupancies will be available November 2016.

#### Modules:

- Mercantile, Industrial, and Storage Occupancies
- Educational and Day-Care Occupancies
- Health Care, Ambulatory Health Care, and Board and Care Occupancies
- Residential (One- and Two-Family Dwellings, Lodging or Rooming Houses, Hotels and Dormitories and Apartments) and Detention and Correctional Occupancies
- Assembly Occupancies

**2-DAY CLASSROOM TRAINING**

**NEW! 2012 NFPA 99 Health Care Facilities Code**

Learn about the 2012 edition of *NFPA 99: Health Care Facilities Code* directly from leading industry professionals. In this collaborative program, Code experts guide you through *NFPA 99*'s revised content and reorganization, taking an in-depth look at how to conduct a risk-based analysis. Hands-on exercises and activities give you a working knowledge of the Code.

**Upon completion you should be able to:**

- Discuss how the 2012 edition of *NFPA 99* has been rewritten and reorganized to apply a risk-based approach to requirements
- Correctly apply new requirements that consider operating rooms wet locations unless a risk assessment of the area determines otherwise
- Review the updated requirements for gas equipment

**1-DAY CLASSROOM TRAINING**

**NEW! 2012 NFPA 101® and NFPA 99 Changes**

The U.S. Centers for Medicare & Medicaid Services (CMS) has officially adopted the 2012 editions of *NFPA 101: Life Safety Code®* and *NFPA 99: Health Care Facilities Code*. Examine major changes between the 2000-2012 *NFPA 101* and the 1999-2012 *NFPA 99*, as well as their impact on health care facilities. Code experts provide insights into the requirements mandated by the new (CMS) Conditions of Participation. In one day, you'll gain a clearer picture of what you need to know before your next CMS survey!

**Upon completion you should be able to:**

- Understand how changes in the core chapters of 2012 *NFPA 101* will affect health care facilities as they migrate from the 2000 to the 2012 edition
- Understand key changes in the health care chapters of the 2012 edition of *NFPA 101*
- Explain "risk assessment" as used in the 2012 edition of *NFPA 99*

**3-DAY CLASSROOM TRAINING**

**2015 NFPA 101®  
Life Safety Code® Essentials**

Gain the tools you need to confidently apply or enforce requirements in the 2015 *Life Safety Code*. Expert-led classroom training spans many aspects of *NFPA 101* application, with a special section covering building rehabilitation. To solidify knowledge, participants will work through a fully developed case study—a unique opportunity to practice *Life Safety Code* application on a realistic scenario.

Confirm your understanding of topics covered and demonstrate proficiency by earning your Certificate of Educational Achievement, available after the class through an online review and exam.

**Upon completion you should be able to:**

- Explain requirements for new, existing, and rehabilitated buildings
- Explain classification of occupancies
- Determine requirements for enclosure and protection of the means of egress

## 2-DAY CLASSROOM TRAINING

### Certified Fire Protection Specialist (CFPS®) Primer

Success on the CFPS examination demands a high level of proficiency with the fire, life, and building safety facts in the NFPA® 20th edition *Fire Protection Handbook®* (FPH®), which serves as the official body of knowledge for the examination. While not a test prep program, the CFPS Primer does offer practical, hands-on instruction that will help you quickly locate specific information within the FPH.

**Upon completion you should be able to:**

- Quickly reference facts and information in the FPH
- Understand the organization of the content found in the *Fire Protection Handbook*
- Describe the six strategies of the Systems Approach to Building Fire Safety

## 4-DAY CLASSROOM TRAINING

### **NEW!** Certified Fire Inspector I

NFPA® offers the CFI-I Certification to signify you have the experience, education, and knowledge it takes to handle the responsibilities of your job. This in-depth four-day classroom training is designed to help you prepare to take the CFI-I Certification Exam, which is offered on Day 5. The NFPA CFI-I Certification is now Pro Board® recognized.

This class will teach you the basic principles of fire and life safety, meeting the requirements of *NFPA 1031* for Fire Inspector. The class covers the complete use of the *Life Safety Code®*, as well as key provisions from referenced codes and standards. Supplemental topics include storage and handling of hazardous materials; the reviewing, testing, and acceptance of water and chemical based fire protection systems; fire alarms; and many other topics related to being a fire inspector. This course also covers the legal aspects of being an AHJ. It is recommended that participants review the IFSTA *Fire Inspection and Code Enforcement* text or have prior fire inspection experience.

**Upon completion you should be able to:**

- Identify the responsibilities of a fire inspector and the knowledge required to perform the job
- Understand the use and application of NFPA codes and standards
- Know fire and life safety principles and how they are applied

➤ **Certified Fire Inspector I Classroom Training** (Without CFI-I Exam\*)

**2-DAY CLASSROOM TRAINING**

**NEW! 2016 NFPA 350 Guide for Safe Confined Space Entry and Work**

On average every year in the U.S., 92 workers are killed working in or adjacent to confined spaces. By law, employers must comply with applicable OSHA regulations such as 29 CFR 1910.146 and 29 CFR 1926 Subpart AA. This two-day training uses the requirements of OSHA as a base but goes beyond OSHA regulations to provide practical guidance on how to comply with the requirements in these regulations. You'll learn directly from NFPA code experts about *NFPA 350's* provisions that help you recognize, evaluate, and control hazards, so you can avoid devastating accidents. Scenario-based, hands-on exercises and collaborative discussion help you interpret and apply concepts.

**Upon completion you should be able to:**

- Describe *NFPA 350's* purpose and contents
- Identify confined spaces, hazards and control measures
- Demonstrate atmospheric monitoring of a confined space
